Freedom without adventure

Caravan or motorhome owners heading out on holiday want to experience independence, but in their own way.

Those who develop, design and produce these homes on wheels have to set technological and design trends with every new model series.

Those who have HELLA on board as a partner have boundless possibilities – as developers, manufacturers and users. HELLA means real freedom - free from risky adventures.

Depth of innovation. Modular concepts.

Technological leadership.

HELLA has established a leading global position through diligence, creativity and precision quality. For over one hundred years. HELLA and modern caravanning – a permanently successful relationship.

- More safety due to innovations in lighting technology:
- e.g. Xenon and LED.
- More efficiency due to integrated electric and electronic components.
- More equipment options, more brand characteristics and more trendsetting: e.g. through an extraordinarily deep range of products and modular systems.
- More safety in production and use: due to original equipment quality, synergies from developments in the international car industry and zero error quality management.

On site HELLA Support.

We don't only see ourselves as a quality supplier, but also as a development partner. If required, our developers and engineers can work on the optimum solution for your application with your teams on your premises. This speeds up workflows and clears the way for new standards. More technological freedom, more styling freedom, more room for rationalisation: That is HELLA.

Have a good trip to the future.

We are the 100% service provider for innovative individual customising and for 100 % reliability.

New dimensions in the lighting segment:

After decades of standard solutions, HELLA has continually broken new grounds – and became Number 1 for customer-specific solutions. The lead is growing because there are cutting-edge solutions available that only HELLA has to offer. We are able to cover applications for all global brands due to the work done in our own lighting laboratory.

New dimensions in the field of modular concepts:

Engineers, designers and controllers are equally delighted with our modular system. It provides you with the whole spectrum of design possibilities – from futuristic through dynamic, sporty, business-like, elegant, classic to retro.

Our range offers solutions that no one else can offer. At HELLA, you can take your pick from our entire line of modern headlights and lights, ranging from: halogen, Bi-Halogen®, Xenon, Bi-Xenon®, LED, light transmitters, Ellipsoid and FreeForm FF. You give us the installation opening and select the design, we will build your module. In small production runs too, of course.

New dimensions of modular speed:

We want to be faster than everyone else. An optimised time-to-market process from the first lines on a notebook through to series delivery allows us to create your individual design in no time.

New dimensions in the field of electrics and electronics:

HELLA covers the whole range of possibilities. From modern standard solutions to custom application development. And we remain true to our motto “More safety and more comfort” in this case, too. HELLA offers the combination of safety stoplight and rear view camera in one solution, as well as applications for closing and locking aids for storage compartment flaps and caravan doors. Also new: The switch generation with 6,000 lasering and illumination possibilities.

**So take us with you on your journey to the future.
Because like you, we love real freedom.**

1965

HELLA universal 2-chamber combination rear light series 1305 with lens reflectors using bulb technology in the smallest conceivable design.

1973

Further development of the 3-chamber combination rear light series. The 1131 series is launched in a very progressive design for the time.

1978

The HELLA universal 3-chamber combination rear light series 1140 – designed as a surface-mounted solution for towed vehicles such as trailers – becomes the lighting standard for caravans.

1998

The modular light series 122 mm for individual and combined lights is launched. The series will be enhanced on an ongoing basis in the next few years through pattern-free lights and LED lights.

2000

The customer-specific multi-function light with pattern-free lens adorns hobby caravans.

2002

The Caraluna success story continues. The first HELLA specific light with pattern-free lens for caravans and motorhomes is launched – Caraluna II for horizontal surface-mounting.

2006

Customer-specific developments for hobby caravans and motorhomes, Hymer motorhomes and Fendt caravans and motorhomes. Upgrade to Caraluna multi-function light series: Caraluna II Plus with combined indicator/reversing spotlight.

2008

A success story continues: The Caraluna Modular for vertical flush-mounting joins the Caraluna family. Pattern-free and coloured lens with modular reflector inserts, which allow for a customised appearance, installation with bulb-based or LED technology and horizontal flush-mounting.

2009

Upgrade round light 122 mm in LED and new member of the Caraluna family: Caraluna Vertical with chrome effect.

Quick trip to the past

The first "touring cars" appeared as early as the mid-19th century. The sometimes quite luxuriously equipped predecessors of the modern caravan were invented in Britain. Initially they were horse-drawn, but shortly after the invention of the motor vehicle the first petrol-driven coaches were hitched to the travel cars. There has been a close relationship between HELLA and the automobile for over one hundred years, and this naturally includes caravans and motorhomes.

Here is a quick look at our most recent shared past.

1986

The HELLA universal 4-chamber combination rear light series 4460 as surface-mounted solution with lens pattern becomes established. The design size increases in line with the more stringent safety requirements for more light output.

1989

The HELLA universal 3-chamber combination rear light series 6459 with lens pattern finds its way into the caravan industry. The light sweep allows it to be flush-mounted near the outer edges. This design effect gives a whole new dimension to motorhome and caravan contours.

1996

Birth of the first multi-function light for the motorhome and caravan industry. As well as integrating all the light functions, the triangular reflector required is also integrated in horizontal installation position. The HELLA Caraluna I becomes a sign of quality and brand recognition for a whole industry.

2003

Customer-specific multi-function light Fendt Caravan with chrome effect due to the use of a transparent lens with high-sheen vapour-plated reflectors.

2004

The success story of Caraluna II will be further developed: The Caraluna II with chrome effect and transparent lens with high-sheen vapour-plated reflectors is launched on the market.

2005

Modular light series Agroluna for individual and combined lights with pattern-free lenses and bulb-based technology is launched. Customer-specific multi-function light Bürstner and Chateau.

2010

HELLA matches the lighting technology inside the light with the fluid exterior body design. A ring-shaped 3D body around the edge which generates a "glowing look" due to the use of cutting-edge LED technology takes over the taillight function and gives the rear end of the new Fendt Brilliant a unique and unmistakable appearance.

2011

HELLA adapts the lighting technology of a highly innovative lighting geometry for the Hobby Premium Caravan. Two opposing "Hockey stick" shaped 3D lights, with LED technology for taillight and stop light, highlight the successful shape of the vehicle. The remaining conventionally solved functions are installed behind an elegant stripe pattern and go into the handle which overlaps into the lights. Simply premium. A milestone in caravan construction.

2011

Two opposing eyebrow-shaped lights installed using innovative light-transmitting technology in LED technology for the taillight give Knaus motorhomes of the last generation an unmistakable face. The lights are impressive due to the sophisticated detailing inside. According to the motto: You will see motorhomes with different eyes.

More design freedom through LEDs

The use of LEDs gives design engineers much greater design freedom. Ergonomic aspects can be implemented more easily.

Diverse technical options through LEDs.

Depending on the product or customer requirements, HELLA has been installing LEDs in different optical lighting systems. Here are some examples of combination rear lights:

	<p>Direct light</p>	<ul style="list-style-type: none"> → Spot-like appearance → No optical system necessary → Max. distance from 2 LEDs = 15 mm
	<p>Fresnel Systems</p>	<ul style="list-style-type: none"> → Suitable for all functions → Homogeneous appearance
	<p>Reflector with pattern/ lens without pattern</p>	<ul style="list-style-type: none"> → Greater efficiency → Brilliant appearance
	<p>Light transmitting systems</p>	<ul style="list-style-type: none"> → Elongated appearance → Homogenous illumination → Adapted to curved exterior shape

LED indicators and the patented failure check

Legal requirement in all ECE states

The indicators on vehicles registered for use on public roads must be monitored. An indicator failure must be communicated to the driver visually or acoustically. In all ECE states, the following holds: A potential failure of the indicator must therefore be monitored by the vehicle. Manufacturers use different control methods for this purpose. However, the failure controls in use today cannot detect simple LED lights and display an error when they are used. All HELLA LED indicators have integrated electronics for failure control. The indicators monitor themselves. They generate an impulse that is evaluated by the electronic ballast. This ballast simulates a 21W bulb which allows them to be used with conventional indicators.

Even if a single LED fails, the light will be shown as faulty and the pulse will no longer be generated. In this case, the ballast switches off the bulb simulation and the indicator reports the fault to the driver.

Safe conversion to LED indicators is now possible using patented HELLA electronics

HELLA supplies electronic ballasts for all HELLA LED indicators which makes it possible to convert the indicator failure display for various vehicles. This is necessary if the vehicle manufacturer does not guarantee indicator bulb failure checking via the vehicle's electrical system.

The method is patented by HELLA. There are currently three different ballasts and several different LED indicators available.

LED-light failure check and correct electrical connection

Operation of the LED light with AC voltage or synchronised DC voltage is not permitted. The individual light functions may only be operated with a vehicle fuse of max. 3 A.

Due to the low watt output of LED lights, which are distinctly different from a bulb version, problems can arise in bulb failure control when operating traction vehicles.

As checking of the indicators is required by law, we recommend operating the light only in conjunction with the indicator control unit, HELLA part no. 5DS 009 552-...

Furthermore, some traction vehicles detect other light functions. This represents a vehicle comfort function that is not required by law and does not release the driver from his obligation to visually inspect the lighting equipment. Even in this case, low outputs can lead to misdiagnoses (instrument panel in the cab shows a light failure even though it is working fine).

Should misdiagnoses, as described above, occur while operating your traction vehicle, please contact the traction vehicle manufacturer.

FRONT LIGHTING

Ultrasonic headlight range adjustment	Page	29

DynaView® Evo2

A new lighting era

DynaView® Evo2 combines the cornering light and fog light safety functions in compact round auxiliary lights which can be universally installed in many different vehicles. When the low beam is switched on, the right or left cornering light is activated automatically and immediately when the indicator is actuated or when the vehicle drives round a bend at a speed of less than 40 km/h.

A yaw rate sensor measures the vehicle's angular acceleration and triggers the turn-on signal when the car drives through a curve. At the end of the curve, a dimmer softly fades the extra light. If the reverse gear is engaged, both cornering lights are switched on and ensure broad and bright illumination of the areas along the left and right of the vehicle.

"The cornering light is switched off during normal driving situations on a straight stretch of road."

"When turning a corner or driving slowly through a curve (up to a speed of 40 km/h), the cornering light is turned on automatically."

"When driving round a bend up to a speed of 40 km/h, the respective headlight is switched on automatically."

"In foggy conditions, the cornering light can be switched on manually (both sides) as a fog light."

Daytime running light

Benefits of the daytime running light

The daytime running light provides a decisive safety advantage in road traffic and reduces the number of accidents which result in serious injuries by 58%*.

For this reason, and long before the introduction of any legal requirement, HELLA developed daytime running lights to increase driving safety.

Daytime running lights are safer than low beams.

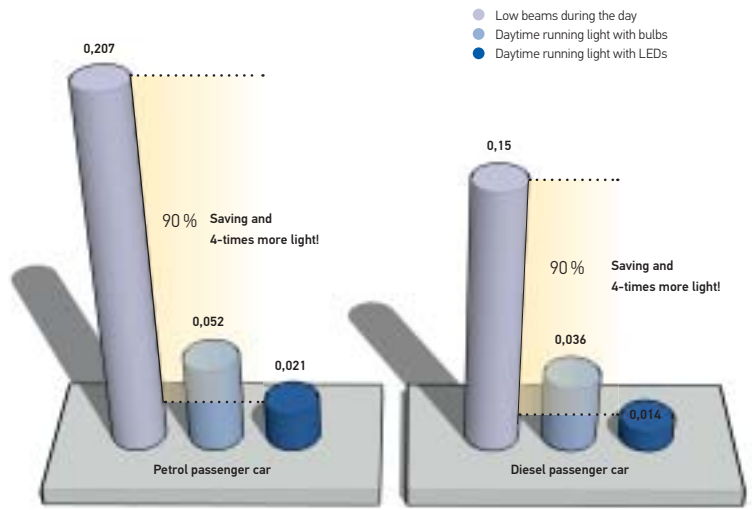

The HELLA daytime running lights generate a passively radiating white signal light. This enables the vehicle to be seen earlier and better by other road-users. HELLA thus ensures extra reaction time and offers a noticeable safety advantage.

* Study carried out by the SWOV-Institute for Road Safety Research on behalf of the EU.

Comparison low beams and daytime running lights

LED DAYTIME RUNNING LIGHT SET, RECTANGULAR DESIGN

2 lights including harness, universal bracket,
3 high-performance LEDs per light, multi-voltage 9-33V
12 V/5.5 W, current consumption = approx. 2.18 A

Set for surface-mounting **2PT 009 496-801**

Individual light without bracket,
DRL with PO function **2PT 009 496-007**

Type approval 2344

Daytime running light

LEDAYFLEX LED DAYTIME RUNNING LIGHT

Adaptation to the vehicle contour within the context of type-approved surface-mounted systems, extremely flat module design height (Ø 30 mm, depth 22.3 mm), modern design combined with LED power, 30 x longer service life than H7 bulbs, high-performance LEDs for best light output, lights up automatically when ignition is switched on.

5 light modules for daytime running light **2PT 010 458-801**

5 daytime running light/position light modules* **2PT 010 458-811**

Harness, pre-assembled **8KA 165 959-001**

Type approval 5852

LEDAYLINE® LED DAYTIME RUNNING LIGHT SET WITH POSITION LIGHT FUNCTION

2 lights with five LED diodes per light and integrated relay for fully automatic switch-on, incl. professional harness and attachment material, multi-voltage 9-32 V, 12 V max. 5.5 W

Attachment set, 12 V **2PT 010 043-801**

12 V, left **2PT 010 043-011**

12 V, right **2PT 010 043-021**

Type approval 2578

VEHICLE-SPECIFIC FINISHER, BLACK (ONLY DAYTIME RUNNING LIGHT)

Suitable for Fiat Ducato, Citroën Jumper, Peugeot Boxer. incl. connection harness, assembly material instructions. **2PT 010 043-811**

LED DAYTIME RUNNING LIGHTS SET, ROUND DESIGN

2 lights including harness, universal bracket, 3 high-performance LEDs per light, multi-voltage 9-33V 12 V/5.5 W, current consumption = approx. 2.18 A

Set for surface-mounting **2PT 009 599-811**

Individual light without bracket, left **2PT 009 599-011**

without bracket, right **2PT 009 599-021**

without bracket, with PO function, left **2PT 009 599-031**

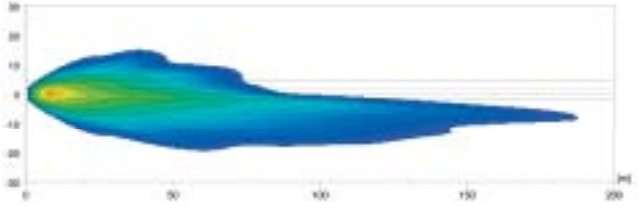

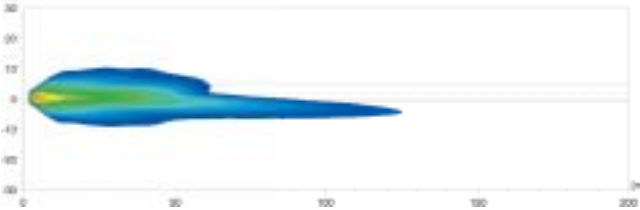

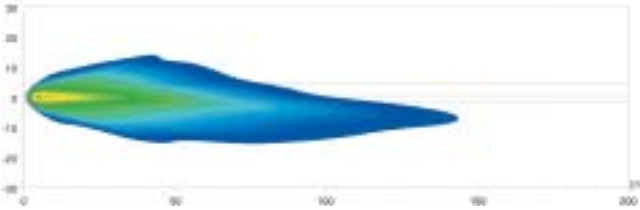

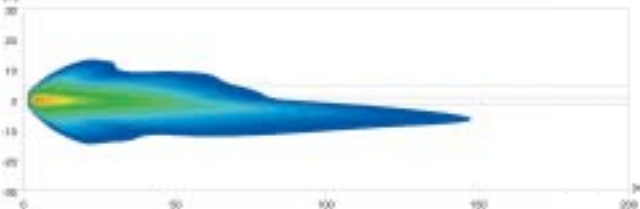

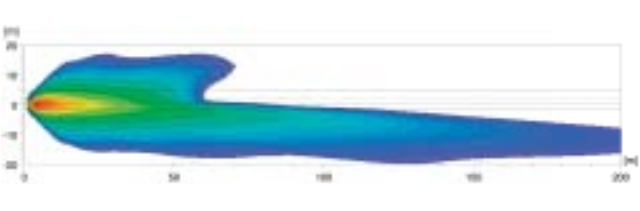

without bracket, with PO function, right **2PT 009 599-041**

Universal carrier frame **9AH 165 968-001**

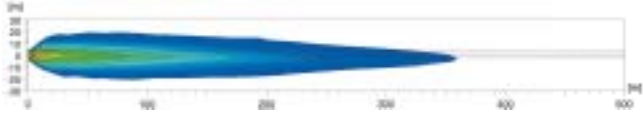

Harness, pre-assembled **8KA 165 959-001**

Type approval 2372

90 mm Premium LED module

The light colour, which is similar to daylight, offers more safety and comfortable, fatigue-free driving. Three white high-performance LEDs function as a light source. The light is projected through the 70 mm DE lens homogeneously on the street.

The service life of the headlight, normally more than 15,000* real operating hours, offers major cost savings when it comes to maintenance and repair costs compared to other light systems**.

Exclusive automobiles distinguish themselves through their cutting-edge technology.

The HELLA LED low beam module is so high-tech that the technological advance in each turn-on action makes it clear and thus creates a visible distance to the ground.

LED LOW BEAM HEADLIGHT

Maintenance-free module for normally more than 15,000 operating hours, very homogenous light and rapid start time, 35 watt power consumption, no movable parts, passive cooling system, plastic covering pane, vehicle security system: 5 A

Right-hand traffic	1BL 010 820-001
Left-hand traffic	1ML 010 820-011
Carrier frame	9AH 169 580-011

Type approval  ES 3159 and LES 3160

* at about 50°C ambient temperature

** In the ECE R48 area of application, due to the legal situation, it is necessary to ensure failure control for a LED headlight in the vehicle's electrical system through suitable measures.

90 mm Premium

High-end illumination. Low beam and high beam from a single headlight module, choice of Xenon or halogen technology. Pattern-free glass cover lens. High-quality aluminium reflector. With Xenon, waterproof ballast. Connection using 0.5 metre shielded supply cable with detachable plug-type connection.

BI-XENON HEADLIGHTS FOR LOW BEAM HEADLIGHTS AND SPOTLIGHTS, 12 V

Xenon low beam headlight and spotlight in one lamp unit, Xenon low beam light only permitted with headlight range adjustment and lens cleaning system.

Right-hand traffic, D2S, ECE	1AL 009 997-001
Left-hand traffic, D2S, ECE	1LL 009 997-011
Right-hand traffic, D2S, SAE	1AL 009 997-021

Type approval 2484 and 2485

BI-HALOGEN, MAIN HEADLIGHT FOR LOW BEAM HEADLIGHTS AND SPOTLIGHTS, 12 V

Halogen low beam headlight and spotlight in one lamp unit.

Right-hand traffic, H7, ECE	1AL 009 998-001
Left-hand traffic, H7, ECE	1LL 009 998-011
Right-hand traffic, H9, SAE	1AL 009 998-021

Type approval 2484 and 2485

HALOGEN LOW BEAM HEADLIGHT, 12 V

Metal reflectors with clear DE lens. Ideal in combination with the matching spotlights and fog lights, including light source.

Right-hand traffic, H7, ECE	1BL 009 999-001
Left-hand traffic, H7, ECE	1ML 009 999-011
Right-hand traffic, H7, SAE	1BL 009 999-021

Type approval 2486 and 2487

Info

Would you like to combine modules of the Premium and Performance series without having to commit yourself right at the start of the vehicle design process?

Then use the tried-and-trusted Premium carrier frame structure as a basis. This is compatible for the future, too.

Alongside the complete Premium range, the following modules from the Performance series can also be used.

MODULE ATTACHMENT

90 mm spotlight with PO, 12 V bulb, Right-hand traffic	1KO 247 043-117
90 mm spotlight 12 V bulb, Right-hand traffic	1KO 247 043-127
90 mm spotlight 12 V bulb, Right-hand traffic	1BL 247 042-177
Connector for H1 bulb low beam headlight	8JD 156 151-807
Connector PO for spotlight module	8JD 156 150-807

90 mm Performance

Optimised illumination. Modules in enhanced quality for use on long journeys.
With splashwater-proof plug-type connector.

HALOGEN LOW BEAM HEADLIGHT, 12 V

Module headlight with aluminium reflector and clear DE lens behind pattern-free glass cover lens

Right-hand traffic, H1	1BL 247 042-007* 1BL 247 042-001*
Left-hand traffic, H1	1ML 247 042-027* 1ML 247 042-021*

Type approval 2397 and 2398

* Right-hand traffic variant can be switched from asymmetrical low beam to symmetrical light. Left-hand traffic variant can be switched from symmetrical to asymmetrical.

HALOGEN SPOTLIGHT, 12 V

Module headlight with aluminium FF reflector and clear DE lens behind pattern-free glass cover lens

with position light, H1	1KO 247 043-007 1KO 247 043-001
without position light	1KO 247 043-017 1KO 247 043-011

Type approval 2397

Info

If you have been using Classic modules so far, you can easily upgrade these to Performance modules.

The following Performance modules have the same module attachment as the Classic module and are therefore compatible and easy to replace – without having to modify the existing Classic carrier frame structure first.

MODULE ATTACHMENT

90 mm spotlight with PO, 12 V bulb, Right-hand traffic	1KO 247 043-157
90 mm spotlight 12 V bulb, Right-hand traffic	1KO 247 043-167
90 mm spotlight 12 V bulb, Right-hand traffic	1BL 247 042-217
Connector for H1 bulb low beam headlight	8JD 156 151-807
Connector PO for spotlight module	8JD 156 150-807

90 mm Classic

BI-XENON - HEADLIGHTS, 12 V DIPPED- AND HIGH BEAM IN ONE HEADLIGHT

Module headlight with integrated ignition unit and pattern-free glass cover lens. High-quality metal reflector. Waterproof Xenon electronic ballast. 1 metre shielded supply cable with detachable plug-type connections.

Right-hand traffic	1AL 008 934-001*
Left-hand traffic	1LL 008 934-011*
SAE (USA) right-hand traffic	1AL 008 934-041

Type approval 1677

ACCESSORIES FOR BI-XENON

Plug for ballast	8JA 990 295-127
Plug for switching spotlight	8JD 162 211-801

* Right-hand traffic variant can be switched from asymmetrical low beam to symmetrical light. Left-hand traffic variant can be switched from symmetrical to asymmetrical.

LOW BEAM HEADLIGHT, 12 V

Module headlight with pattern-free glass cover lens, magnesium reflectors and clear DE lens.

Xenon low beam headlight

D2 S	1BL 008 194-007
D2S, USA version	1BL 008 194-047

Type approval 917

Halogen low beam headlight

Headlight cleaning systems

Legislation prescribes the use of a headlight cleaning system when Xenon low beam headlights are used. (The system can also be used for halogen headlights and spotlights.)

HELLA cleaning systems work according to the water jet principle, which manages without wipers and brushes by using the kinetic energy from the thick water drops to loosen and rinse away dirt particles from the lens.

Ultrasonic headlight range adjustment (LWR)

The ultrasonic system is a headlight range adjustment system for 50 mm and 90 mm headlight modules for original equipment and upgrading vehicles with Xenon headlights.

The sensor in this system measures the distance from the vehicle undercarriage to the road and forwards the signal to the central control unit, which then optimally adjusts the headlights via the actuator motors on the Xenon headlights.

For more detailed information, see assembly instructions.

SIDE MARKER LIGHT SET

for horizontal and vertical flush-mounting, 4 units each, with amber 12 V / 5 W bulb

		ECE	SAE (USA)
in arrow design	2PS 008 541-801*	X	

Type approval 1223

Info

For vehicles < 6 m in length and/or < 3.5 t, auxiliary indicators of category 5 are prescribed, and for vehicles > 6 m in length and/or > 3.5 t, auxiliary indicators of category 6 are legal requirements.

Auxiliary indicators

AUXILIARY INDICATORS

Category 5 for 12 V, for flush-mounting on the side

small, space-saving

2BM 003 563-111

Type approval 42621

AUXILIARY INDICATORS

Category 5 and 6 for 12 V and 24 V / 21 W, for surface-mounting on the side

left

2BM 006 692-017

right

2BM 006 692-027

Type approval 0152621

AUXILIARY INDICATORS

Category 6 for 24 V / 21 W, extremely flat design, for surface-mounting on the side

Lens, amber

2BM 008 355-001

Type approval 1059

Glass-clear lens

2BM 008 355-017

Type approval 1848

Harness for non splashwater-proof area

8KA 157 425-007

LED AUXILIARY INDICATOR

for horizontal flush-mounting, category 5, simple gluing into prepared mirror, can also be used as a universal auxiliary indicator

12 V/0.7 W, current consumption = approx. 0.06 A

2BM 008 771-007*

	ECE	SAE (USA)
	X	X

Type approval 011423

* Please see the note on pages 8 and 9 regarding LED indicators and LED indicator failure check.

■ SAE type approval for vehicles < 2,032 mm width

● SAE type approval for vehicles < 2,031 mm width

EUROLED

Number of LEDs:	1 white power LED
Connection:	electrical connection through a cable 2,500 mm long
Lens:	white
Voltage:	Multivolt 9 – 33 V
IP protective class:	IP 6K6K, IP 6K7K
Power output:	White 4 W (0.33 A at 12 V) Red <2.5 W (0.20 A at 12 V)
Assembly:	Surface-mounting, permanently bonded with base plate

12 V/4 W, current consumption = approx. 0.33 A

2JA 959 820-501

EUROLED TOUCH

Number of LEDs:	1 white and 8 red
Connection:	electrical, using a cable 2,500 mm long
Lens:	white
Voltage:	Multivolt 9 – 33 V
IP protective class:	IP 6K6K, IP 6K7K
Power output:	White 4 W (0.33 A at 12 V) Red <2.5 W (0.20 A at 12 V)
Assembly:	Surface-mounting, permanently bonded with base plate
Function:	with sensitive switch, for ON/OFF and dimming as well as switching between red and white light

black cover trim

2JA 959 950-031

white cover trim

2JA 959 950-041

CARGOLED

Number of LEDs:	4 white power LEDs
Connection:	electrical, using a cable 310 mm long
Illumination angle:	44° (wide illumination at close range)
Illuminance in 1 m:	180 lux
IP protective class:	6K9K
Power output:	6 W (0.5 A at 12 V)
Lens:	clear
Assembly:	Flush-mounting (aluminium installation frame)
Voltage:	Multivolt (9 – 31 VDC)
Temperature range:	-40 °C to +60 °C

cold white

CARGOLED

Number of LEDs:	36 white LEDs
Connection:	electrical, using a cable 2,500 mm long
Illumination angle:	70°, wide horizontal and narrow vertical illumination
Illuminance:	720 lux
IP protective class:	6K6 6K7
Power output:	9 W (0.75 A at 12 V)
Lens:	clear
Material description:	impact-resistant plastic, UV-resistant
Assembly:	Surface-mounting, permanently bonded with white base plate
Voltage:	Multivolt 9 – 33 VDC

2JA 959 037-511

MINI OVALLED

Number of LEDs:	4 white LEDs, 1 ambient LED
Illumination angle:	50°
Illumination:	side driver or instrument range
Illuminance in 1 m:	Standard 14.5 lux, Power 54 lux
Function:	ambient lighting can be switched on
IP protective class:	6K9K (without frame/switch), 40 (with frame/switch)
Power output:	Standard 1.7 W (0.14 A at 12 V) Power 3.6 W (0.30 A at 12 V)
Lens:	brilliant and clear
Assembly:	Flush-mounting
Voltage:	12 V or 24 V
Current consumption:	12 V/3.6 W, = approx. 0.30 A
Temperature range:	-40 °C to +60 °C

LED LIGHTS WITH SWITCH

Number of LEDs:	12 LEDs
Illuminance in 1 m:	approx. 100 lux
Length:	355 mm
Light colour:	4000 K (neutral white)
Material description:	Lens and frame made of impact-resistant material
Assembly:	Mounting
Nominal output:	3.5 W
Voltage:	Multivolt 10–30 V
Current consumption:	approx. 0.30 A at 12 V, approx. 0.15 A at 24 V

2JA 007 373-151

Number of LEDs:	24 LEDs
Illuminance in 1 m:	approx. 200 lux
Length:	355 mm
Light colour:	4000 K (neutral white)
Material description:	Lens and frame made of impact-resistant material
Assembly:	Mounting
Nominal output:	7 W
Voltage:	Multivolt 10–30 V
Current consumption:	approx. 0.58 A at 12 V, approx. 0.29 A at 24 V

12 V, blue LEDs **2JA 343 606-201**

LED STEP LIGHT

Number of LEDs:	2 white LEDs
Connection:	electrical, through flat plug and grommet
Feature:	with prism rod as a light aperture body
Colouring:	Grey housing
Power output:	0.7 W (0.05 A at 12 V)
Lens:	clear
Assembly:	Surface-mounting (horizontal or vertical)
Voltage:	12 V

2JA 008 078-031

LED STEP LIGHT

Number of LEDs:	10 white LEDs
Connection:	2,500 mm cable
Illumination angle:	24°
Illuminance in 1 m:	130 lux
Feature:	cast in one piece
IP protective class:	6K7 6K9K
Power output:	2 W (0.16 A at 12 V)
Lens:	clear
Delivery scope:	with screws, screw caps, seal, and cable connector
Assembly:	Flush-mounting
Voltage:	12 V

2JA 959 073-001

Orientation lighting

LED STEP LIGHT

Number of LEDs:	1 LED
Connection:	electrical, using a potted cable 100 mm long
Illumination:	wide in close range areas
Illuminance in 1 m:	< 10 lux
Colouring:	White cover cap
Power output:	0.5 W (0.04 A at 12 V)
Lens:	clear
Delivery scope:	with seal
Assembly:	Flush-mounting, choice with 2 screws or possible with snap-on fastening
Voltage:	Multivolt 8 – 28 V

SPOT READING LIGHT

Number of light sources: 1 Xenon bulb 12 V/6 W
 Feature: with flexible metal arm
 Light source: strong and glare-free
 Power output: 6 W (0.50 A at 12 V)
 Lens: clear
 Delivery scope: with bracket for permanent surface-mounting
 Assembly: Mounting
 Voltage: 12 V

a) for fixed installation

500 mm **2AB 004 532-001**

195 mm **2AB 004 532-011**

b) with plug for cigarette lighter

160 mm **2AB 004 532-021**

Accessories

Red lens **9EL 128 922-011**

Spare Parts

Xenon bulb, 12 V **8GP 007 676-121**

Bracket **9XB 136 202-005**

Reading light and ambient lighting

READING LIGHT

Number of light sources:	1 halogen bulb
Connection:	250 mm long cable
Feature:	integrated ON/OFF switch in light head, can be turned (340°), can be pivoted (330°)
Housing:	black
Power output:	5 W (0.42 A at 12 V)
Lens:	red or white replaceable
Assembly:	Mounting
Voltage:	12 V

2AB 004 532-102

LED READING LAMP

Number of LEDs:	1 LED
Illuminance in 1 m:	5 lux
IP protective class:	20
Power output:	0.3 W (0.02 A at 12 V)
Lens:	clear
Delivery scope:	3 frames (white, grey and black)
Assembly:	Surface-mounting via attachment element
Voltage:	12 V

LED red **2JA 344 170-001**

LED blue **2JA 344 170-011**

LED white **2JA 344 170-021**

LED amber **2JA 344 170-031**

Variant LED white with silver instead of grey frame **2JA 344 170-201**

You will find more accessories, relays, normally open relays, changeover relays, sensors, actuators and work lights in our main catalogues and on the internet.

IBScontrol: Intelligent battery sensor with colour display

Which motorhome and caravan enthusiast has not had this experience? Shortly before the start of the holiday, the motorhome or caravan battery is fully charged and ready to go. The first days of the holiday go just fine, but then the battery dies completely. Nothing works! The reasons are varied. On the one hand, there are more and more consumers in the vehicle. Also, as the battery ages, it loses the ability to recharge at 100% of its nominal capacity. The IBScontrol from HELLA measures the virtually available capacity of a battery and transparently shows it in a colour display.

IBScontrol reduces battery risk to a minimum:

- Continuous battery monitoring
- The key information at a glance
- Precision through battery-specific adjustment
- Energy management of consumers
- Intuitive operation
- Very easy installation thanks to plug & play

IBScontrol: The details

- Intelligent battery sensor with colour display for 12 V vehicle electric systems
- Connection of one or two batteries possible
- Precise determination and representation of battery capacity, aging and remaining running time
- Comfortable energy management for upgrading
- Very low current consumption thanks to automatic switch-off
- Four switch outputs and buzzers individually programmable, including hysteresis
- Battery-specific adaptation of the system through selecting the respective battery characteristics (standard starter, Gel and AGM)
- Data logging on SD card with simple analysis option
- Surface-mounted or flush-mounted version

1. Remaining progress display

Shows the remaining running time with current consumption value

2. Current display

Red = discharging
Green = charging

3. Current as numerical value

Example: Current drain 0.1 A

4. Battery aging

(SOH = State of health)
Example: The original battery capacity is already reduced by 2 %

5. State of charge

(SOC = State of charge)
Current state of charge of the battery
Example: State of charge 88 %

Made in Germany

IBScontrol: The variants

IBSCONTROL SET WITH DISPLAY FOR SURFACE-MOUNTED VARIANT

- IBScontrol display (brilliant, black)
- IBS Battery Sensor
- Battery pole adapter
- Completely pre-assembled harness
- Operating/mounting instructions (CD ROM)
- Assembly group (screw, cable tie, retaining plates as per variant)

Surface-mounted variant

6PY 178 103-811

IBSCONTROL SET WITH DISPLAY FOR FLUSH-MOUNTED VARIANT

- IBScontrol display (brilliant, black)
- IBS battery sensor
- Battery pole adapter
- Completely pre-assembled harness
- Operating/mounting instructions (CD ROM)
- Assembly group (screw, cable tie, retaining plates as per variant)

Flush-mounting variant

6PY 178 103-811

IBSCONTROL EXPANSION KIT

Expansion kit for monitoring a second battery, battery sensor IBS, battery pole adapter, completely pre-assembled harness

Set

6PY 178 103-841

Accessories

BATTERY CIRCUIT-BREAKER

for flush-mounting or surface-mounting, removable side wall – several switches can be connect with one another, cable connection: 2 screws M10, protective rating IP 56 according to DIN 40 050, load capacity: 225 A (permanent load) at 12 V/24 V, max. 1000 A (10 s) at 12 V/24 V, central contact (58L/7) with contact pin, load capacity: 20 A at 12 V

6EK 002 843-071

BATTERY CIRCUIT-BREAKER

Max. load: 1000 A at 12 V (10 s), 500 A at 24 V (10 s),
max. constant load: 50 A with connected cable of 35 mm
Type of protection DIN 40050, IP X2

6EK 002 843-002

SERIES OF ROCKER SWITCHES

The entire range of switches can be found in the main HELLA Electrics catalogue.

without illumination, with orientation lighting or with functional lighting
